#### Suggestions and areas of attention for further Improvement (If any):

All good

Should more focus on current scenario, syllabus must be updated regularly according to changes happen in the society and industries

More field visit

More activities should be done related to syllabus

Syllabus should be more applicability to real life situations by giving examples and Case studies to solve. Improvement in the content of the course. Syllabus should be updated with the current trends in industry.

More content should be provided related to the subjects which will help the students to enhance and learn more about the subjects

Requires more practical knowledge with respect to the current market scenario and should arrange more guest lectures for the students so that they can be in touch with the corporate world as well as officials. This will even help the college to be in touch with the officials and will improve the placement platform.

Practical knowledge and simplification of subjects

Overall knowledge being provided are sufficient till now

Make lectures easy to understand

Make lectures easy to understand

No. All teacher teaches great.

improvement needed little in syllabus

No improvement

Need more vacancy in this feild

Case studies, Research and risk analysis by students. Also it would be great if teachers focus an core concepts and understanding of terms rather than just helping the students clear an examination.

Should be related to more practical life

ALVE TO SERVICE OF THE PROPERTY OF THE PROPERT

5	Have you received any complaint regarding any aspect of the syllabus from your ward	24.44	75.56	100.00

#### Suggestions and areas of attention for further Improvement (If any):

Syllabus should be only according to needs in the industry and what is actually applicable in life.

Continuous assessment throughout the year all being added to the semester exams thus leading to lesser students giving supplementary exams as assessment will be based on series of lesser mark tests rather than one higher mark test

Syllabus need massive upgrade, also restrictions on attendance must be reduced

Everything is good

Children should be given less assignment to write

Use of ict tools

Give important question. ....maths revision

Not to make the students write the FC project

Improvement in mathematics coaching

Upgrade the syllabus according to new company act 2013, also upgrade partnership fundamental syllabus in accounts and business economics and commerce.

They should update the syllabus & it should be more professional where students learn what is actual corporate other than bookish knowledge

Economic Should be revise

The syllabus can be more better if practical and updated

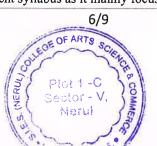

Good Communication With Students

Practical application of concepts.

Use of electronic media

Syllabus must be revised and must contain content relatable to real life examples

Practical knowledge is lacking in the current syllabus as it mainly focusses on theoretical aspect. Syllabus is not latest n

up to date with today's trend..improvement needed in these areas

The subject should be taught practically in depth

Need more concetration on student

Should some parctical knowledge

Implementation of the concepts and techniques taught to the student must be shown/ told to the students

Course content is satisfactory

Syllabus needs to be upgraded.

Please take interactive sessions while teaching so that students are able to imagine the concept and can remember better Please conduct atleast one unit test during the semester that is before the final exam so that students will be regular in their studies

College is not giving active participation In the placement of the students.

Syllabus needs revision, current affairs should be taken into consideration

I think you should teach students from projector

Bring upon the recent scenario and example for the students

Need to give individual attention

No need of any improvements

Add more credit course

The syllabus has to be revamped. It is not accommodating the changes that have happened in the markets.

The syllabus is good and provides in depth knowledge about the advertising and marketing industry.

More practical knowledge should be given to students

Can include more practical syllabus

Universities must produce graduates who are ready for any workplace

We hope for good results

Syllabus must be revised

Give the detail knowledge nd more examples not only the ones that are already given in the textbooks

Interest should be covered

Subjects must have a revision lecture and also the notes must be provided for the subjects.

Subjects could be more about reality than illusions and assumptions. When the contents of the syllabus would be more about real life, they can easily relate and grasp. By this I don't mean real life issues or lessons on how to face the real life but topics that are practically applicable. Most of the students have this complaint that whatever they have studied all this year's was barely required in real life.

Use of ict tools

Conducting more lectures and not cancelling them at last moment!

Revise the books

Proper lectures Time table wise need to be conducted. A child sets up mind and if lectures are not conducted accordingly then the child does not remain interested in the respective lec.

To include real life industry topic in syllabus

Provide more knowledge on basis of their future employment plannings

Question should be provided

Requires practical knowledge

More vocational learning should be introduced. The course should have more areas like film making, script writing and other majors instead of just Advertising and Journalism.

Emphasise more on practical learning than theoretical

New and updated syllabus

Should include more current topics

My only suggestion is that the curriculum should be improvised & that Field Trips & Industrial Visits should be increased

More clear explanations to be done revision of the syllabus

Internship opportunities must be given to students

Quite good

Completion of syllabus on time.

Give some notes to students

Students should not be called on Sundays as it is officially not allowed in any institution.

BMM is a practical subject. Make field/industry visits compulsory and offer it to students for free.

Industry skills must be provided through courses in college at weekdays only

Keep up the good work

Guest lectures could open up the students to career options and other ideas

Overall its good.

Nothing

Improvement in syllabus

Syllabus should provide more contents related to practical training and knowledge

Interacting of students and teachers should be more. Debate sessions and other discussion sessions should be held ocassionally so as to improve child's confidence amd speaking skills

Go for effective teaching

I want 2 suggest that, to keep parents and Teacher meeting before one month of semester.in that meeting ,teacher should inform about students performance and academic growth.

Syllabus should be as per todays industry demand which may feed them job

More interactive lectures in the form of ppt presentation.

All good

Provide better opportunity for internships wnd competitive exams

The syllabus should be completed before the exams and students should be given holiday for studying purpose.

Better topic to be covered

more practical projects are required

I am happy with the development of the college

Students should be given some practical examples to practice

More understanding relations between students and teachers. Request to make more interesting lectures

Focus on e learning

Important questions from exam point of you. Needs thorough revision of all subjects

No comment everything is perfect

Syllabus not been completed as per schedule. Revision required. Industrial visits meaning practical knowledge of banking & finance & practical accounting. All publisher's books should be kept in library.

Words expressed in textbook must be more easy to understand and reliable.
